39th Meeting of the North East Linguistic Society

NE LS 39

Cornell University

November 7-9, 2008

special session:
linguistics at the interfaces

The design of the grammar is standardly assumed to be complex, involving components such as phonetics, phonology, syntax, and semantics. The initial view that components of the grammar are autonomous has proven to be overly strong, and more and more cases of interfaces among components have been documented. This in turn opens questions about the extent and nature of such interfaces: is there a line between interacting components and components without borders?

invited speakers

Arto Anttila
Stanford University

Raffaella Zanuttini
Yale University

Roger Schwarzschild
Rutgers University

organizing committee

Adam Cooper, Effi Georgala, Masayuki Gibson, Christina Kim, Pittayawat Pittayaporn, Peggy Renwick, Becky Butler Thompson, Changhong Zhou

cover design by Teresa Galloway
